Valves and solutions for sanitary processes

DEFINOX PPL PRODUCT PRICE LIST US 2026

PR1-PPL-€-2026-3

English - €

Summary

Find the right valve for your needs according to its main function. The wide range of Definox valves and solutions covers most of the challenges of sanitary process lines for transferring liquids and semi-liquids.

Equipment

DPAX

The Definox DPAX pneumatic butterfly valve is a shut-off valve. Efficient and hygienic in design, the DPAX allows fluid to pass without retention. Its patented seal technologies allow the DPAX to have quick maintenance and reduced OPEX costs. Easily convertible to NO or NC and equipped with a single-acting pneumatic actuator, the DPAX can be fitted with a SORIO control top.

Product advantages

From DN3/4'' to DN150 (DN200 on demand)
SMS, DIN or US sizes.

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

Serviceable actuator
- Easily transformable into Normally Open NO, Normally Closed NC or Double Acting DA.
- Switch from NO to NC: quarter-turn the disc in open position before replacing the actuator.

Use in numerous applications
- EPDM
- FKM
- HNBR.

Easy integration on process lines
- Clamp version machined from solid, available in US and SMS standards
- Smooth or threaded part
- Connections according to DIN 11851 or aseptic DIN 11864 standards

Benefits

- Low Druck drop
- In-line flow
- Expansion stress resistance
- Excellent seals lifetime
- Adaptability
- Fast disassembly and assembly

DPAX DOUBLE ACTING

The Definox DPAX double-acting pneumatic butterfly valve is a shut-off valve. Efficient and hygienic in design, the DPAX allows fluid to pass without retention. Its patented seal technologies allow the DPAX double-acting to have quick maintenance and reduced OPEX costs. Equipped with a double-acting pneumatic actuator, it can be fitted with a SORIO control top.

Product advantages

From DN3/4'' to DN150 (DN200 on demand)
SMS, DIN or US sizes.

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

Serviceable actuator
- Easily transformable into Normally Open NO, Normally Closed NC or Double Acting DA.
- Switch from NO to NC: quarter-turn the disc in open position before replacing the actuator.

Use in numerous applications
- EPDM
- FKM
- HNBR.

Easy integration on process lines
- Clamp version machined from solid, available in US and SMS standards
- Smooth or threaded part
- Connections according to DIN 11851 or aseptic DIN 11864 standards

Benefits

- **Low Druck drop**
- **In-line flow**
- **Expansion stress resistance**
- **Excellent seals lifetime**
- **Adaptability**
- **Fast disassembly and assembly**

DPAX Between Flange

The Definox DPAX EBC flanged pneumatic butterfly valve is a shut-off valve. Efficient and hygienic in design, the DPAX EBC allows fluid to pass without retention. Its design with compact flanges facilitates disassembly and maintenance operations. Added to its patented seal technologies, the DPAX EBC provides a reduced OPEX cost. Easily convertible to NO or NC and equipped with a single-acting pneumatic actuator, the DPAX EBC can be fitted with a SORIO control top.

Product advantages

From DN3/4'' to DN150 (DN200 on demand)
SMS, DIN or US sizes.

Compact flanges
- Fast and simple disassembly.

Use on numerous applications
- EPDM
- FKM
- HNBR

Oring seals
- Allowing the sealing between the half-body and the flange.

Serviceable actuator
- Easily transformable into Normally Open (NO), Normally Closed (NC) or Double Acting (DA)
- Switch from NO to NC: quarter-turn of the disc in open position before replacing the actuator.

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

Benefits

- **Use**
- **No retention**
- **Low Druck drop**
- **Easy maintenance**

DPAX Between Flange DOUBLE ACTING

The Definox DPAX EBC double-acting flanged pneumatic butterfly valve is a shut-off valve. Efficient and hygienic in design, the DPAX EBC double-acting allows fluid to pass without retention. Its design with compact flanges facilitates disassembly and maintenance operations. Added to its patented seal technologies, the DPAX EBC double-acting provides a reduced OPEX cost. Equipped with a double-acting pneumatic actuator, it can be fitted with a SORIO control top.

Product advantages

From DN3/4'' to DN150 (DN200 on demand)
SMS, DIN or US sizes.

Compact flanges
- Fast and simple disassembly.

Use in numerous applications
- EPDM
- FKM
- HNBR.

Oring seals
- Allowing the sealing between the half-body and the flange.

Serviceable actuator
- Easily transformable into Normally Open (NO), Normally Closed (NC) or Double Acting (DA)
- Switch from NO to NC: quarter-turn of the disc in open position before replacing the actuator.

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

Benefits

- **Use**
- **No retention**
- **Low Druck drop**
- **Easy maintenance**

DPX manual

The Definox DPX manual butterfly valve is a shut-off valve. Efficient and hygienic in design, the DPX allows fluid to pass without retention. Its patented seal technologies allow the DPX to have quick maintenance and reduced OPEX costs. Equipped as standard with a 5-position stainless steel handle + 2 intermediate positions, the DPX is also available with micrometric handle, trigger, padlockable option and position detection.

Product advantages

From DN3/4'' to DN150 (DN200 on demand)
SMS, DIN or US sizes.

Various handles for all uses
- Stainless steel handle with customized sleeve
- Micrometric handle
- With detection
- Lockable
- Multiposition.

IO-Link version
- MVQ IO-Link rotary sensor
- Easy integration on the handle
- Integrated self-diagnostics

Use in numerous applications
- EPDM
- FKM
- HNBR.

Easy integration on process lines
- Clamp version machined from solid, available in US and SMS standards
- Smooth or threaded part
- Connections according to DIN 11851 or aseptic DIN 11864 standards

Benefits

- Low Druck drop
- In-line flow
- Expansion stress resistance
- Excellent seals lifetime
- Adaptability
- Fast disassembly and assembly

DPX manual between flange

The Definox DPX EBC flanged manual butterfly valve is a shut-off valve. Efficient and hygienic in design, the DPX EBC allows fluid to pass without retention. Its design with compact flanges facilitates disassembly and maintenance operations. Added to its patented seal technologies, the DPAX EBC provides a reduced OPEX cost. Equipped as standard with a 5-position stainless steel handle + 2 intermediate positions, the DPX EBC is also available with micrometric handle, trigger, padlockable option and position detection.

Product advantages

From DN3/4'' to DN150 (DN200 on demand)
SMS, DIN or US sizes.

Handles for numerous applications
- All stainless steel handle with customizable sleeve
- Lockable with padlock Ø6.5 mm (LOTO – Lock Out / Tag Out)
- Available with trigger version
- 5 intermediate positions + open / closed positions
- Compatible with position detection options

Compact flanges
- Fast and simple disassembly.

Oring seals
- Allowing the sealing between the half-body and the flange.

Use in numerous applications
- EPDM
- FKM
- HNBR.

Benefits

- Use
- No retention
- Low Druck drop
- Easy maintenance

DCX3

The Definox DCX3 single seat valve is a shut-off valve. Robust and hygienic in design, the DCX3 is perfectly cleanable. Its patented seal technologies allow the DCX3 to have quick maintenance and reduced OPEX costs. Thanks to its modularity, the DCX3 can cover a wide range of applications and process configurations. Equipped with a single-acting pneumatic actuator (NO/NC), it can be fitted with a SORIO control topThe Definox DCX3 aseptic single seat valve is a shut-off valve dedicated to sterile processes. It is equipped with a deformable membrane ensuring physical protection between the process and contamination from the atmosphere. Its patented seal technologies allow the DCX3 aseptic to have quick maintenance and reduced OPEX costs. Equipped with a single-acting pneumatic actuator (NO/NC), it can be fitted with a SORIO control top.

Product advantages

From DN25 to DN150
- SMS, DIN or US versions
- Variant up to DN 250.

Mass-machined spherical body
- Configurations available: L, T, cross or half-cross body.

Elastomer sealing
- EPDM or FKM
- Adapted to abrasive or loaded products

Serviceable actuator
- Easily transformable Normally Open NO, Normally Closed, Double Acting DA.

One-piece plug with PFA floating seal
- Sturdy design, avoiding any risk of breakage or unscrewing
- PEEK plug variant for steam and chemical applications.

Use in numerous applications
- Various sealing solutions: PFA, elastomer, metal metal
- Numerous connections: SMS, DIN, Clamp

Long stroke version
- Maximum plug clearance
- Adapted to fibrous or fragile fluids as well as big particles.

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

Benefits

- Optimal cleanability
- One-piece plug
- Spherical body
- No risk of tampering
- Chemical resistance
- Modular design
- Easy maintenance

DCX3 Aseptic

The Definox DCX3 aseptic single seat valve is a shut-off valve dedicated to sterile processes. It is equipped with a deformable membrane ensuring physical protection between the process and contamination from the atmosphere. Its patented seal technologies allow the DCX3 aseptic to have quick maintenance and reduced OPEX costs. Equipped with a single-acting pneumatic actuator (NO/NC), it can be fitted with a SORIO control top.

Product advantages

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

Mass-machined spherical body
- Configurations available: L, T, cross or half-cross body.

PTFE deformable diaphragm
- Ensuring a physical break against the exterior environment.

One-piece plug with PFA floating seal
- Sturdy design, avoiding any risk of breakage or unscrewing
- PEEK plug variant for steam and chemical applications.

Use in numerous applications
- Various sealing solutions: PFA, elastomer, metal metal
- Numerous connections: SMS, DIN, Clamp

Serviceable actuator
- Easily transformable Normally Open NO, Normally Closed, Double Acting DA.

Benefits

- Optimal cleanability
- One-piece plug
- Spherical body
- No risk of tampering
- Chemical resistance
- Modular design
- Easy maintenance

DCX3 DOUBLE ACTING

The Definox DCX3 double-acting single seat valve is a shut-off valve. Robust and hygienic in design, the DCX3 is perfectly cleanable. Its patented seal technologies allow the DCX3 to have quick maintenance and reduced OPEX costs. Thanks to its modularity, the DCX3 can cover a wide range of applications and process configurations. Equipped with a double-acting pneumatic actuator, it can be fitted with a SORIO control top

Product advantages

From DN25 to DN150
- SMS, DIN or US versions
- Variant up to DN 250.

Mass-machined spherical body
- Configurations available: L, T, cross or half-cross body.

Elastomer sealing
- EPDM or FKM
- Adapted to abrasive or loaded products

Serviceable actuator
- Easily transformable Normally Open NO, Normally Closed, Double Acting DA.

One-piece plug with PFA floating seal
- Sturdy design, avoiding any risk of breakage or unscrewing
- PEEK plug variant for steam and chemical applications.

Use in numerous applications
- Various sealing solutions: PFA, elastomer, metal metal
- Numerous connections: SMS, DIN, Clamp

Long stroke version
- Maximum plug clearance
- Adapted to fibrous or fragile fluids as well as big particles.

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

Benefits

- Optimal cleanability
- One-piece plug
- Spherical body
- No risk of tampering
- Chemical resistance
- Modular design
- Easy maintenance

DCX3 RELIEF VALVES

The Definox DCX3 relief single seat valve allows precise adjustment of the calibration value and the possibility of sealing the preset pressure value. Exceeding this pressure causes the valve to open, which allows the main circuit to be unloaded to protect certain devices or circuits. The DCX3 relief valve can also be opened during CIP phases. Robust and hygienic in design, it has the same advantages as the DCX3. It can be fitted with a Sorio control top.

Product advantages

From DN25 to DN150
- SMS, DIN or US versions
- Variant up to DN 250.

Mass-machined spherical body
- Configurations available: L, T, cross or half-cross body.

Elastomer sealing
- EPDM or FKM
- Adapted to abrasive or loaded products

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

Use in numerous applications
- Various sealing solutions: PFA, elastomer, metal metal
- Numerous connections: SMS, DIN, Clamp

Serviceable actuator
- Easily transformable Normally Open NO, Normally Closed, Double Acting DA.

Benefits

- Optimal cleanability
- One-piece plug
- Spherical body
- No risk of tampering
- Chemical resistance
- Modular design
- Easy maintenance

DCX3p small size

The Definox DCX3P single seat valve is a small diameter shut-off valve (DN1/2" to 1"). Robust and hygienic in design, the DCX3P is perfectly cleanable. Its patented seal technologies allow the DCX3P to have quick maintenance and reduced OPEX costs. Thanks to its modularity, the DCX3P can cover a wide range of applications and process configurations. Equipped with a single-acting pneumatic actuator (NO/NC), it can be fitted with a SORIO control top. DCX3P often equip our STARMOTION pigging modules or our STARWHEEL injection solutions.

Product advantages

From DN1/2'' to DN1''
- Available exclusively in US 3A sizes, with polished internal weld, weld end or clamp end

Compact serviceable actuator
- Pneumatic actuator easily transformable: Normally Open NO, Normally Closed NC or Double Acting DA.

Stainless steel plug with elastomer seal variant
- Available in EPDM, FKM, FFKM or PFA/FFKM.

PEEK plug
- Inert material to chemical agents
- EPDM, FKM or FFKM sealing.

One-piece compact body
- Configurations available: T, L or cross body.

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

Benefits

- Tightness Druck
- Adjustable actuator
- Easy maintenance

DCX3 Diaphragm Aseptic DOUBLE ACTING

The Definox DCX3 aseptic double-acting single seat valve is a shut-off valve dedicated to sterile processes. It is equipped with a deformable membrane ensuring physical protection between the process and contamination from the atmosphere. Its patented seal technologies allow the DCX3 Aseptic to have quick maintenance and reduced OPEX costs. Equipped with a double-acting pneumatic actuator, it can be fitted with a SORIO control top.

Product advantages

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

Mass-machined spherical body
- Configurations available: L, T, cross or half-cross body.

PTFE deformable diaphragm
- Ensuring a physical break against the exterior environment.

One-piece plug with PFA floating seal
- Sturdy design, avoiding any risk of breakage or unscrewing
- PEEK plug variant for steam and chemical applications.

Use in numerous applications
- Various sealing solutions: PFA, elastomer, metal metal
- Numerous connections: SMS, DIN, Clamp

Serviceable actuator
- Easily transformable Normally Open NO, Normally Closed, Double Acting DA.

Benefits

- Optimal cleanability
- One-piece plug
- Spherical body
- No risk of tampering
- Chemical resistance
- Modular design
- Easy maintenance

C

ACTUATOR	
C	Double acting pneumatic actuator

0

BODY	
0	None
1	L body
2	T body
3	X body
7	1/2 X Body

7

SEAL	
7	DIAPHRAGM/PFA

1

FINISHING	
1	internal finishing 0,8 µm
2	internal finishing 0,8 µm + polished (US3A)

00

SETTING	
00	Standard setting

CONNECTION	
	Butt Weld
R55	Clamp ends

Variants

DCX3 Diaphragm Aseptic DOUBLE ACTING : Double acting pneumatic actuator

Standard : DIN (EN-10357)

Name	Reference	Diameter	Seal	Body	Setting
DCX3 Diaphragm Aseptic DOUBLE ACTING	BD025C07100	DIN25	MEMBRANE PFA	None	Standard setting

DCX3 Aseptic Steam Actuator

The Definox DCX3 steam barrier single seat valve is a shut-off valve dedicated to sterile processes. It is equipped with a device ensuring the sterilization of the valve stem in contact with the outside and the process and thus guarantees protection against atmosphere contamination. Its patented seal technologies allow the DCX3 steam barrier to have quick maintenance and reduced OPEX costs. Equipped with a single-acting pneumatic actuator (NO/NC), it can be fitted with a SORIO control top.

Product advantages

From DN25 to DN150
- SMS, DIN or US versions
- Variant up to DN 250.

Mass-machined spherical body
- Configurations available: L, T, cross or half-cross body.

Elastomer sealing
- EPDM or FKM
- Adapted to abrasive or loaded products

Serviceable actuator
- Easily transformable Normally Open NO, Normally Closed, Double Acting DA.

One-piece plug with PFA floating seal
- Sturdy design, avoiding any risk of breakage or unscrewing
- PEEK plug variant for steam and chemical applications.

Use in numerous applications
- Various sealing solutions: PFA, elastomer, metal metal
- Numerous connections: SMS, DIN, Clamp

Long stroke version
- Maximum plug clearance
- Adapted to fibrous or fragile fluids as well as big particles.

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

Benefits

- Optimal cleanability
- One-piece plug
- Spherical body
- No risk of tampering
- Chemical resistance
- Modular design
- Easy maintenance

DCX3p manual small size

The Definox DCX3P manual single seat valve is a small diameter shut-off valve (DN1/2" to 1"). Robust and hygienic in design, the manual DCX3P is perfectly cleanable. Its patented seal technologies allow the manual DCX3P to have quick maintenance and reduced OPEX costs. Thanks to its modularity, it can cover a wide range of applications and process configurations. Equipped in this version with a manual actuator. DCX3P often equip our STARMOTION pigging modules or our STARWHEEL injection solutions.

Product advantages

From DN1/2'' to DN1''
- Available exclusively in US 3A sizes, with polished internal weld, weld end or clamp end

One-piece compact body
- Configurations available: T, L or cross body.

Ergonomic handle
- With visual opening indicator.

PEEK plug
- Inert material to chemical agents
- EPDM, FKM or FFKM sealing.

Stainless steel plug with elastomer seal variant
- Available in EPDM, FKM, FFKM or PFA/FFKM.

Benefits

- Tightness Druck
- Adjustable actuator
- Easy maintenance

TECHNICAL DATA

DBAX

The Definox DBAX pneumatically actuated ball valve completes the range of process valves. It is suitable for auxiliary circuits. Full or reduced bore depending on the diameters. Equipped with a single-acting pneumatic actuator (NO/NC), it can be fitted with a SORIO control top

Product advantages

From DN 8 to DN 50, full bore

Serviceable actuator

- Easily transformable: Normally Open NO, Normally Closed NC or Double Acting DA.
- Can be equipped with Sorio control top.

Control Top and Signalling

- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

Butt-weld connection

Benefits

Snap Resistance

Chemical resistance

Powder circulation

DBAX DOUBLE ACTING

The Definox DBAX DE double-acting pneumatic ball valve completes the range of process valves. It is suitable for auxiliary circuits. Full or reduced bore depending on the diameters. Equipped with a double-acting pneumatic actuator, it can be fitted with a SORIO control top

Product advantages

From DN 8 to DN 50, full bore

Serviceable actuator

- Easily transformable: Normally Open NO, Normally Closed NC or Double Acting DA.
- Can be equipped with Sorio control top.

Control Top and Signalling

- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

Butt-weld connection

Benefits

- **Snap Resistance**
- **Chemical resistance**
- **Powder circulation**

DBX

The Definox DBX manual ball valve completes the range of process valves. It is suitable for auxiliary circuits. Full or reduced bore depending on the diameters.

Product advantages

- From DN 8 to DN 50, full bore
- Left or right-opening handle
- Butt-weld connection

Benefits

- Snap Resistance
- Chemical resistance
- Powder circulation

NEOS ELASTO

The NEOS double sealing is a shut-off valve with leak detection. It makes it possible to alert on a sealing failure thanks to its leak chamber, avoiding any risk of mixing. The NEOS can be equipped with an additional cleaning microvalve to flush the leak chamber. Robust and hygienic in design, its patented seal technologies allow the NEOS to have quick maintenance and reduced OPEX costs. Equipped with a single-acting pneumatic actuator (NO/NC), it can be fitted with a SORIO control top.

Product advantages

From DN25 to DN100 (DN125 and DN150 on demand)
- SMS, DIN or US sizes.

Normally open leak indicator
- Ensuring leak detection
- Possible control via a control top.

Serviceable actuator
- Easily transformable Normally Open NO, Normally Closed NC or Double Acting DA.

One-piece plug and mass-machined body
- Hygienic sturdy design avoiding any risk of breakage or unscrewing.
- Body configuration L, T or X.

Cleaning microvalve optional
- Allowing the cleaning of the leakage chamber, valve closed.

Feedback and control
- With Sorio control top, available in Digital, AS-i and IO-Link versions
- 2 SV (solenoïd valves) for 1 microvalve
- 3 SV (solenoïd valves) for 2 microvalves.

Benefits

- Secured design
- Physical barrier
- High resistance to expansion stresses
- Facilitated maintenance
- Optimum cleaning

NEOS DIAPHRAGM

The NEOS membrane double sealing is a shut-off valve with leak detection. It makes it possible to alert on a sealing failure thanks to its leak chamber, avoiding any risk of mixing. Equipped with a lantern membrane, the NEOS membrane provides very good resistance to aggressive products or CIP environments. The NEOS membrane can be equipped with an additional cleaning microvalve to flush the leak chamber. Robust and hygienic in design, its patented seal technologies allow the NEOS to have quick maintenance and reduced OPEX costs. Equipped with a single-acting pneumatic actuator (NO/NC), it can be fitted with a SORIO control top.

Product advantages

From DN25 to DN100 (DN125 and DN150 on demand)
- SMS, DIN or US sizes.

Floating PFA or elastomer seal
- Ensuring an absolute tightness at high temperature
- Seal profile facilitating the circulation of the cleaning agent on all faces of the seal.
- Elastomer version EPDM or FKM

Cleaning microvalve optional
- Allowing the cleaning of the leakage chamber, valve closed.

PTFE deformable diaphragm
- Ensuring a physical break against the exterior environment.

One-piece plug and mass-machined body
- Hygienic sturdy design avoiding any risk of breakage or unscrewing.
- Body configuration L, T or X.

Normally open leak indicator
- Ensuring leak detection
- Possible control via a control top.

Serviceable actuator
- Easily transformable Normally Open NO, Normally Closed NC or Double Acting DA.

Feedback and control
- With Sorio control top, available in Digital, AS-i and IO-Link versions
- 2 SV (solenoïd valves) for 1 microvalve
- 3 SV (solenoïd valves) for 2 microvalves.

Benefits

- Secured design
- Physical barrier
- High resistance to expansion stresses
- Facilitated maintenance
- Optimum cleaning
- High resistance against aggressive products

VEOX

The Definox VEOX double seat mixproof is a leak chamber valve with no loss of product when opening. VEOX integrates a physical break between two circuits. This technology makes the crossing of two fluids of different nature possible in complete safety with visualizing an eventual leak. Flipping the valve plugs ensures complete cleaning without opening the valve. Complete cleaning of the balancer, efficient sealing solutions, quick disassembly and serviceable actuator allow the VEOX to offer perfect cleanability and reduced cost of use. It can be fitted with a Sorio control top.

Product advantages

From DN 25 to DN 150
- SMS, DIN or US sizes
- DN 150, on request

Control Top and Signalling
- From the SORIO 1EV, 2EV or 3EV control unit (optional), available in digital, AS-i or IO-Link versions
- Compatible with SORIO Basic 1EV, 2EV or 3EV (optional) or with secure M12 bracket detection

3 interchangeable sealings to cover all applications
- with PFA floating seal (long lifetime)
- or an elastomer seal (EPDM, FKM or HNBR).

22 solid machined bodies configurations
Guaranteeing a high level of resistance to mechanical and thermal distorsion.

Sliding radial seal on the lower plug, with stainless steel insert
- Pressure and temperature performances improved
- Better seal stability, limiting its expansion.

Serviceable actuator
- Maintainable and guaranteeing power and instantaneous valve movements.

Solid machined balancer
- Offering good resistance against water hammer
- Cleaning of the outer face of the balancer avoiding risk of contamination
- No clogging on sticky applications.

PEEK plug for extreme conditions
- Withstand a pressure of up to 13 bar, even with high temperature
- Continuous steam sterilization
- Suitable for sticky products (no interplug seal).

No special tooling for maintenance
- Less than 2 minutes to disassemble the lower plug and replace the seal
- Quick, simple servicing thanks to clamp collar
- Ensuring immediate response and power of the plug movements.

Benefits

- Lower plug lift
- Costs under control
- Extreme conditions
- Availability of the lines
- Optimum cleaning
- Hygienic and secured
- Flexibility of the fleet of valves
- Reduction in product loss

TECHNICAL DATA

Technical details

Technical information

Process material	316L (1.4404)
Maintenance manual number	NM272

VEOX 3 bodies

The Definox VEOX 3 bodies mixproof valve combines the functions of non-mixing between the two upper ports and diverting between the two lower ports. It can be fitted with a Sorio control top.

Product advantages

From DN38 to DN150
SMS, DIN or US sizes.

Sliding radial seal with stainless steel insert on the lower plug
- Improved pressure and temperature performances
- Improved seal stability, limiting its expansion.

L or T lower body

Serviceable actuator
- Maintainable and guaranteeing power and instantaneous valve movements.

Control Top and Signalling
- From the SORIO 1EV, 2EV or 3EV control unit (optional), available in digital, AS-i or IO-Link versions
- Compatible with SORIO Basic 1EV, 2EV or 3EV (optional) or with secure M12 bracket detection

3 interchangeable sealings to cover all applications
- with PFA floating seal (long lifetime)
- or an elastomer seal (EPDM, FKM or HNBR).

22 models available for the upper body

One-piece machined balancer
- Offering good resistance against water hammer
- Allowing the cleaning of the balancer outer face ; no risk of contamination.

No special tooling for the valve maintenance
- Less than 2 minutes to disassemble the lower plug and replace the seal
- Quick, simple servicing thanks to clamp collar

Benefits

- Secured and hygienic
- Flexibility of the fleet of valves
- Optimization of the lines
- Reduction in product loss
- Optimum cleaning
- Maintenance costs

VEOX Two Different Line Sizes

The Definox VEOX two different line sizes mixproof is a leak chamber valve is a leak chamber valve with no loss of product when opening. VEOX integrates a physical break between two circuits. This technology makes the crossing of two fluids of different nature possible in complete safety with visualizing an eventual leak. Flipping the valve plugs ensures complete cleaning without opening the valve. The two different line sizes version allows you to combine up to four gap diameters, between the upper track and the lower track (depending on the body configurations). Complete cleaning of the balancer, efficient sealing solutions, quick disassembly and serviceable actuator allow the VEOX to offer perfect cleanability and reduced cost of use. It can be fitted with a Sorio control top.

Product advantages

From DN 25 to DN 150
- SMS, DIN or US sizes
- DN 150, on request

Solid machined balancer
- Offering good resistance against water hammer
- Cleaning of the outer face of the balancer avoiding risk of contamination
- No clogging on sticky applications.

PEEK plug for extreme conditions
- Withstand a pressure of up to 13 bar, even with high temperature
- Continuous steam sterilization
- Suitable for sticky products (no interplug seal).

No special tooling for maintenance
- Less than 2 minutes to disassemble the lower plug and replace the seal
- Quick, simple servicing thanks to clamp collar
- Ensuring immediate response and power of the plug movements.

Multi size bodied version
- Allowing the combination of up to 2 diameters difference between the higher and lower lines
- No risk of fragility.

Control Top and Signalling
- From the SORIO 1EV, 2EV or 3EV control unit (optional), available in digital, AS-i or IO-Link versions
- Compatible with SORIO Basic 1EV, 2EV or 3EV (optional) or with secure M12 bracket detection

22 solid machined bodies configurations
Guaranteeing a high level of resistance to mechanical and thermal distorsion.

Sliding radial seal on the lower plug, with stainless steel insert
- Pressure and temperature performances improved
- Better seal stability, limiting its expansion.

Benefits

- Lower plug lift
- Costs under control
- Extreme conditions
- Availability of the lines
- Optimum cleaning
- Hygienic and secured
- Flexibility of the fleet of valves
- Reduction in product loss

Variants

VEOX Two Different Line Sizes : Pneumatic actuator with 2 seat lift

Standard : DIN (EN-10357)

Name	Reference	Diameter upper channel	Diameter upper channel	Seal	Body model
VEOX Two Different Line Sizes	YD1D3F15101	DIN25	DIN40	EPDM/EPDM	Model 01
VEOX Two Different Line Sizes	YD1D3F15102	DIN25	DIN40	EPDM/EPDM	Model 02
VEOX Two Different Line Sizes	YD1D3F15103	DIN25	DIN40	EPDM/EPDM	Model 03
VEOX Two Different Line Sizes	YD1D3F15104	DIN25	DIN40	EPDM/EPDM	Model 04
VEOX Two Different Line Sizes	YD1D3F15105	DIN25	DIN40	EPDM/EPDM	Model 05
VEOX Two Different Line Sizes	YD1D3F15106	DIN25	DIN40	EPDM/EPDM	Model 06
VEOX Two Different Line Sizes	YD1D3F15107	DIN25	DIN40	EPDM/EPDM	Model 07
VEOX Two Different Line Sizes	YD1D3F15108	DIN25	DIN40	EPDM/EPDM	Model 08
VEOX Two Different Line Sizes	YD1D3F15109	DIN25	DIN40	EPDM/EPDM	Model 09
VEOX Two Different Line Sizes	YD1D3F15110	DIN25	DIN40	EPDM/EPDM	Model 10
VEOX Two Different Line Sizes	YD1D3F15111	DIN25	DIN40	EPDM/EPDM	Model 11
VEOX Two Different Line Sizes	YD1D3F15112	DIN25	DIN40	EPDM/EPDM	Model 12
VEOX Two Different Line Sizes	YD1D3F15113	DIN25	DIN40	EPDM/EPDM	Model 13
VEOX Two Different Line Sizes	YD1D3F15114	DIN25	DIN40	EPDM/EPDM	Model 14
VEOX Two Different Line Sizes	YD1D3F15115	DIN25	DIN40	EPDM/EPDM	Model 15
VEOX Two Different Line Sizes	YD1D3F15116	DIN25	DIN40	EPDM/EPDM	Model 16
VEOX Two Different Line Sizes	YD1D3F15117	DIN25	DIN40	EPDM/EPDM	Model 17
VEOX Two Different Line Sizes	YD1D3F15118	DIN25	DIN40	EPDM/EPDM	Model 18
VEOX Two Different Line Sizes	YD1D3F15119	DIN25	DIN40	EPDM/EPDM	Model 19
VEOX Two Different Line Sizes	YD1D3F15120	DIN25	DIN40	EPDM/EPDM	Model 20
VEOX Two Different Line Sizes	YD1D3F15121	DIN25	DIN40	EPDM/EPDM	Model 21
VEOX Two Different Line Sizes	YD1D3F16101	DIN25	DIN40	FKM/ FKM	Model 01
VEOX Two Different Line Sizes	YD1D3F16102	DIN25	DIN40	FKM/ FKM	Model 02
VEOX Two Different Line Sizes	YD1D3F16103	DIN25	DIN40	FKM/ FKM	Model 03
VEOX Two Different Line Sizes	YD1D3F16104	DIN25	DIN40	FKM/ FKM	Model 04
VEOX Two Different Line Sizes	YD1D3F16105	DIN25	DIN40	FKM/ FKM	Model 05
VEOX Two Different Line Sizes	YD1D3F16106	DIN25	DIN40	FKM/ FKM	Model 06
VEOX Two Different Line Sizes	YD1D3F16107	DIN25	DIN40	FKM/ FKM	Model 07
VEOX Two Different Line Sizes	YD1D3F16108	DIN25	DIN40	FKM/ FKM	Model 08
VEOX Two Different Line Sizes	YD1D3F16109	DIN25	DIN40	FKM/ FKM	Model 09
VEOX Two Different Line Sizes	YD1D3F16110	DIN25	DIN40	FKM/ FKM	Model 10
VEOX Two Different Line Sizes	YD1D3F16111	DIN25	DIN40	FKM/ FKM	Model 11
VEOX Two Different Line Sizes	YD1D3F16112	DIN25	DIN40	FKM/ FKM	Model 12
VEOX Two Different Line Sizes	YD1D3F16113	DIN25	DIN40	FKM/ FKM	Model 13
VEOX Two Different Line Sizes	YD1D3F16114	DIN25	DIN40	FKM/ FKM	Model 14
VEOX Two Different Line Sizes	YD1D3F16115	DIN25	DIN40	FKM/ FKM	Model 15

VEOX PMO

The Definox VEOX PMO mixproof is a leak chamber valve with no loss of product when opening. It follows the North American "Pasteurized Milk Ordinance" regulations and has 3A certification. The VEOX PMO integrates a physical break between two circuits. This technology makes the crossing of two fluids of different nature possible in complete safety with visualizing an eventual leak. Flipping the valve plugs ensures complete cleaning without opening the valve. Complete cleaning of the balancer, efficient sealing solutions, quick disassembly and serviceable actuator allow the VEOX to offer perfect cleanability and reduced cost of use. It can be fitted with a Sorio control top.

Product advantages

From DN1"1/2 to 4"
Available exclusively in US 3A sizes, with polished internal weld, weld end or clamp end.

Solid machined balancer
- Offering good resistance against water hammer
- Cleaning of the outer face of the balancer avoiding risk of contamination
- No clogging on sticky applications.

No special tooling for maintenance
- Less than 2 minutes to disassemble the lower plug and replace the seal
- Quick, simple servicing thanks to clamp collar
- Ensuring immediate response and power of the plug movements.

Control Top and Signalling
- From the SORIO 1EV, 2EV or 3EV control unit (optional), available in digital, AS-i or IO-Link versions
- Compatible with SORIO Basic 1EV, 2EV or 3EV (optional) or with secure M12 bracket detection

22 solid machined bodies configurations
Guaranteeing a high level of resistance to mechanical and thermal distorsion.

Sliding radial seal on the lower plug, with stainless steel insert
- Pressure and temperature performances improved
- Better seal stability, limiting its expansion.

Benefits

- Costs under control
- Extreme conditions
- Availability of the lines
- Optimum cleaning
- Hygienic and secured
- Flexibility of the fleet of valves
- Reduction in product loss

VEOX Tank Bottom

The Definox VEOX FC tank bottom mixproof valve makes it possible to isolate the tank from the rest of the process circuit. It integrates a physical break between two circuits and authorizes the crossing of two fluids of different nature. Visualization of an eventual leak is ensured by a fixed leak outlet. It can be fitted with a Sorio control top.

Product advantages

From DN25 to DN100 (DN125 and DN150 on demand)
- SMS, DIN or US sizes.

360° flange to weld
- Without orientation constraint.

Elastomer sealing
- EPDM or FKM
- Adapted to process fluids containing particles.

Control Top and Signalling
- From the SORIO 1EV, 2EV or 3EV control unit (optional), available in digital, AS-i or IO-Link versions
- Compatible with SORIO Basic 1EV, 2EV or 3EV (optional) or with secure M12 bracket detection

Sliding radial seal on the lower plug, with stainless steel insert
- Pressure and temperature performances improved
- Better seal stability, limiting its expansion.

One-piece machined plug and body
- L or T body guaranteeing a very high resistance to mechanical and thermal deformations
- Shape of the body ensuring a sealing as close as possible to the wall of the tank.

PFA floating seal
- Excellent cleaning by circulating cleaning fluid over all faces of the seal.
- High resistance to aggressive chemical products and to high temperatures.

Serviceable actuator
- Maintainable and guaranteeing power and instantaneous valve movements.

No special tooling for maintenance
- Less than 2 minutes to disassemble the lower plug and replace the seal
- Quick, simple servicing thanks to clamp collar

Benefits

- Hygienic and secured
- Optimum cleaning
- Lifting of the plug
- Maintenance costs
- Fast installation

PRODUCT NOMENCLATURE BREAKDOWN

Example : YT D040 F 1 3 1 01

YT VEOX Tank Bottom D040 DIN40 F Pneumatic actuator with 2 seat lift 1 L body

3 PFA/EPDM 1 internal finishing 0,8 µm 01 With flange

D040

DIAMÈTRE	
D040	DIN40
D050	DIN50
D065	DIN65
D080	DIN80
D100	DIN100
S038	SMS38
S051	SMS51
S063	SMS63
S076	SMS76
S104	SMS104
U038	US1''1/2
U051	US2''
U063	US2''1/2
U076	US3''
U101	US4''

F

ACTUATOR	
F	Pneumatic actuator with 2 seat lift

1

BODY	
1	L body
2	T body

3

SEAL	
3	PFA/EPDM
4	PFA/FKM
5	EPDM/EPDM
6	SP ELASTO/ELASTO (FKM)

1

FINISHING	
1	internal finishing 0,8 µm

01

FLANGE	
01	With flange
02	Without flange

Variants

VEOX Tank Bottom : Pneumatic actuator with 2 seat lift

Standard : DIN (EN-10357)

Name	Reference	Diameter	Seal	Body	Flange
VEOX Tank Bottom	YTD040F13101	DIN40	PFA/EPDM	L body	With flange
VEOX Tank Bottom	YTD040F13102	DIN40	PFA/EPDM	L body	Without flange

DCX4

The Definox DCX4 single seat valve is a divert valve. Robust and hygienic in design, the DCX4 is perfectly cleanable. Its patented seal technologies allow the DCX4 to have quick maintenance and reduced OPEX costs. Thanks to its modularity and its choice of bodies, the DCX4 can cover a wide range of applications and process configurations. Equipped with a single-acting pneumatic actuator (NO/NC), it can be fitted with a SORIO control top.

Product advantages

From DN25 to DN150
- SMS, DIN or US sizes.

Mass-machined spherical body
- Body configurations available: L/L, L/T, T/L, T/T, L/X.

Elastomer sealing
- EPDM or FKM
- Adapted to abrasive product or loaded fluids.

One-piece plug with PFA floating seal
- Sturdy design avoidant any risk of breakage or unscrewing.

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

Serviceable actuator
- Easily transformable: Normally Open NL, Normally Closed NC or Double Acting DA.

Benefits

- Optimum cleaning
- Expansion stress constraints
- Interchangeability
- No risk of alteration
- Resistance against chemical products
- Easy maintenance

DCX4 Aseptic

The Definox DCX4 aseptic single seat valve is a divert valve dedicated to sterile processes. It is equipped with a deformable membrane ensuring physical protection between the process and contamination from the atmosphere. Its patented seal technologies allow the DCX4 Aseptic to have quick maintenance and reduced OPEX costs. Equipped with a single-acting pneumatic actuator (NO/NC), it can be fitted with a SORIO control top.

Product advantages

From DN25 to DN150
- SMS, DIN or US sizes.

Mass-machined spherical body
- Body configurations available: L/L, L/T, T/L, T/T, L/X.

PTFE deformable diaphragm
- Ensuring a physical break against the exterior environment.

One-piece plug with PFA floating seal
- Sturdy design avoidant any risk of breakage or unscrewing.

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

Serviceable actuator
- Easily transformable: Normally Open NL, Normally Closed NC or Double Acting DA.

Benefits

- Optimum cleaning
- Expansion stress constraints
- Interchangeability
- No risk of alteration
- Resistance against chemical products
- Easy maintenance

A

ACTUATOR	
A	Normally closed pneumatic actuator
B	Normally open pneumatic actuator

0

BODY	
0	None
1	LL body
2	TL body
3	LT body
4	TT body

7

SEAL	
7	DIAPHRAGM/PFA/EPDM

1

FINISHING	
1	internal finishing 0,8 µm
2	internal finishing 0,8 µm + polished (US3A)

00

COMPLEMENT	
00	None

CONNECTION	
	Butt Weld
R55	Clamp ends

Variants

DCX4 Aseptic : Normally closed pneumatic actuator

Standard : DIN (EN-10357)

DCX4 DOUBLE ACTING

The Definox DCX4 double-acting single seat valve is a divert valve. Robust and hygienic in design, the DCX4 is perfectly cleanable. Its patented seal technologies allow the DCX4 to have quick maintenance and reduced OPEX costs. Thanks to its modularity and its choice of bodies, the DCX4 can cover a wide range of applications and process configurations. Equipped with a double-acting pneumatic actuator, it can be fitted with a SORIO control top.

Product advantages

From DN25 to DN150
- SMS, DIN or US sizes.

Mass-machined spherical body
- Body configurations available: L/L, L/T, T/L, T/T, L/X.

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

One-piece plug with PFA floating seal
- Sturdy design avoidant any risk of breakage or unscrewing.

Elastomer sealing
- EPDM or FKM
- Adapted to abrasive product or loaded fluids.

Serviceable actuator
- Easily transformable: Normally Open NL, Normally Closed NC or Double Acting DA.

Benefits

- Optimum cleaning
- Expansion stress constraints
- Interchangeability
- No risk of alteration
- Resistance against chemical products
- Easy maintenance

DCX4P

The Definox DCX4P single seat valve is a small diameter divert valve (DN1/2" to 1"). Robust and hygienic in design, the DCX4P is perfectly cleanable. Its patented seal technologies allow the DCX4P to have quick maintenance and reduced OPEX costs. Thanks to its modularity, the DCX4P can cover a wide range of applications and process configurations. Equipped with a single-acting pneumatic actuator (NO/NC), it can be fitted with a SORIO control top. DCX4P often equip our STARMOTION pigging modules or our STARWHEEL injection solutions.

Product advantages

From DN1/2'' to DN1''
- Available exclusively in US 3A sizes, with polished internal weld, weld end or clamp end

PEEK plug
- Inert material to chemical agents
- EPDM, FKM or FFKM sealing.

Compact serviceable actuator
- Easily transformable: Normally Open NO, Normally Closed NC or Double Acting DA.

Compact one-piece body
- Configurations available: L/L, T/L or L/T body.

Stainless steel plug with elastomer seal variant
- Available in EPDM, FKM, FFKM or PFA/FFKM.

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

Benefits

- **High leaktightness Druck**
- **Adjustable actuator**
- **Easy maintenance**

DCX4 Aseptic DOUBLE ACTING

The Definox DCX4 aseptic double-acting single seat valve is a divert valve dedicated to sterile processes. It is equipped with a deformable membrane ensuring physical protection between the process and contamination from the atmosphere. Its patented seal technologies allow the DCX4 Aseptic to have quick maintenance and reduced OPEX costs. Equipped with a double-acting pneumatic actuator, it can be fitted with a SORIO control top.

Product advantages

From DN25 to DN150
- SMS, DIN or US sizes.

Mass-machined spherical body
- Body configurations available: L/L, L/T, T/L, T/T, L/X.

PTFE deformable diaphragm
- Ensuring a physical break against the exterior environment.

One-piece plug with PFA floating seal
- Sturdy design avoidant any risk of breakage or unscrewing.

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

Serviceable actuator
- Easily transformable: Normally Open NL, Normally Closed NC or Double Acting DA.

Benefits

- Optimum cleaning
- Expansion stress constraints
- Interchangeability
- No risk of alteration
- Resistance against chemical products
- Easy maintenance

DCX4 Aseptic Steam Actuator

The Definox DCX4 steam barrier single seat valve is a divert valve dedicated to sterile processes. It is equipped with a device ensuring the sterilization of the valve stem in contact with the outside and the process and thus guarantees protection against atmosphere contamination. Its patented seal technologies allow the DCX4 Steam Bearing to have quick maintenance and reduced OPEX costs. Equipped with a single-acting pneumatic actuator (NO/NC), it can be fitted with a SORIO control top.

Product advantages

From DN25 to DN150
- SMS, DIN or US sizes.

Mass-machined spherical body
- Body configurations available: L/L, L/T, T/L, T/T, L/X.

Elastomer sealing
- EPDM or FKM
- Adapted to abrasive product or loaded fluids.

One-piece plug with PFA floating seal
- Sturdy design avoidant any risk of breakage or unscrewing.

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

Serviceable actuator
- Easily transformable: Normally Open NL, Normally Closed NC or Double Acting DA.

Benefits

- Optimum cleaning
- Expansion stress constraints
- Interchangeability
- No risk of alteration
- Resistance against chemical products
- Easy maintenance

DCX4P manual

The Definox DCX4P manual single seat valve is a small diameter divert valve (DN1/2" to 1"). Robust and hygienic in design, the manual DCX4P is perfectly cleanable. Its patented seal technologies allow the manual DCX4P to have quick maintenance and reduced OPEX costs. Thanks to its modularity, it can cover a wide range of applications and process configurations. DCX4P often equip our STARMOTION pigging modules or our STARWHEEL injection solutions. Equipped in this version with a manual actuator.

Product advantages

From DN1/2'' to DN1''
- Available exclusively in US 3A sizes, with polished internal weld, weld end or clamp end

PEEK plug
- Inert material to chemical agents
- EPDM, FKM or FFKM sealing.

Ergonomic handle
- With opening visual indicator.

Compact one-piece body
- Configurations available: L/L, T/L or L/T body.

Stainless steel plug with elastomer seal variant
- Available in EPDM, FKM, FFKM or PFA/FFKM.

Benefits

High leaktightness Druck

Adjustable actuator

Easy maintenance

DCX3REGUL

The Definox DCX3 REGUL is a regulating valve intended for hygienic processes. Equipped with a pneumatic actuator and a positioner, it allows precise regulation of a flow rate from a 4-20mA or 0-10V signal. Available with different plugs profiles, with or without sealing , the different configurations of the DCX3 REGUL will meet your needs. Several options are also available for sterile processes such as the version with membrane or steam barrier.

Product advantages

From DN25 to DN100
- SMS, DIN or US sizes.

Serviceable actuator
- Easily transformable Normally Open NO or Normally Closed NC.

Optional positioner
- 4/20 mA
- IO Link
- ASi

3 plug profiles
- Tight or not tight
- Profiled, small or very small section
- EPDM, FKM or diaphragm.

Mass-machined spherical L body

Elastomer sealing
- EPDM or FKM
- Adapted to abrasive product or loaded fluids.

Benefits

- Plug shape
- Precise adjustment
- Simple programming
- Expansion stress constraints
- Easy maintenance
- Spherical body
- Hygienic design
- Modular design

DCX3FC

The Definox DCX3FC single seat valve is a tank bottom valve. Equipped with a mass flange, it is used to isolate the tank from the process during the emptying or filling phases of the tanks. The DCX3FC is available as a valve exiting into the tank (raising plug) or entering the valve (lowering plug). Robust and hygienic in design, the DCX3FC is perfectly cleanable. Its patented seal technologies allow the DCX3FC to have quick maintenance and reduced OPEX costs. Equipped with a single-acting pneumatic actuator (NO/NC), it can be fitted with a SORIO control top. Also available in long stroke version for complete clearance of the valve and to preserve the consistency of the fluid.

Product advantages

From DN25 to DN100 (DN125 and DN150 on demand)
- SMS, DIN or US sizes.

Serviceable actuator
- Easily transformable Normally Open NO, Normally Closed NC.

Numerous sealing solutions
- EPDM or FKM
- Adapted to fluids with particles or abrasive fluids.

Long stroke actuator
- Ensuring the complete clerarance of the plug
- Protecting the fragile fluids or fluids with particles.

2 versions
- Rising plug
- Lowering plug.

One-piece plug, with PFA floating seal
- Surdy design avoiding risk of breakage or unscrewing.

Mass-machined spherical body
- T or L body.

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

Benefits

- No retention zone
- Easy maintenance
- Adapted to fluids with particles or fragile
- High resistance
- Reduced Druck drop
- Optimum cleaning

PEAX

The Definox PEAX pneumatic sampling valve allows simple and secure sampling, using two sterilization methods, with a flame or by circulation of a cleaning product or steam. Their modular design and numerous connection possibilities allow them to adapt to all usage configurations. Can be fitted with a manual forcing lever and a Sorio control top.

Product advantages

DN6/8 DN10/12 and DN16/19

6 connections for greater adaptability
- Wall welded
- Pipe line welded
- 1/2" male gas end
- Clamp (diam. 50.4 mm)
- Mini-clamp (diam. 34 mm)
- Micro-clamp (diam. 25.4 mm).

Sterilization with injection of steam or cleaning agent, 2 outlets
- 2 outlets body configuration

Special alloys on request
- HC22
- SMO 254
- AL6XN.

Normally closed NC compact serviceable actuator
- Possibility of adapting an operating lever for manual control in an automatic cycle
- The actuator can be equipped with a Sorio control top, for remote control and feedback of the valve.

"

One-piece mass-machined body
- Homogeneous surface finishing
- Removing roughness or defects, bound to outlets welding.

Flame sterilization, 1 outlet
- 1 outlet body configuration

6 types of sealing suitable to many applications
- PFA/EPDM or PFA/FKM plug
- EPDM, FKM, anti-acid FKM, VMQ diaphragm.

Compact serviceable actuator
- Easily transformable: Normally Open NO, Normally Closed NC or Double Acting DA.

Benefits

- Hygienic design
- Numerous connections
- Optimum cleaning
- Tailor-made solution
- Good performance
- Compact and modular

PEX

The Definox PEX manual sampling valve allows simple and secure sampling, using two sterilization methods, by flame or by circulation of a cleaning product or steam. Their modular design and numerous connection possibilities allow them to adapt to all usage configurations. The PEX is fitted with a plastic or a stainless steel handle.

Product advantages

DN6/8 DN10/12 and DN16/19

6 connections for greater adaptability
- Wall welded
- Pipe line welded
- 1/2" male gas end
- Clamp (diam. 50.4 mm)
- Mini-clamp (diam. 34 mm)
- Micro-clamp (diam. 25.4 mm).

Sterilization with injection of steam or cleaning agent, 2 outlets
- 2 outlets body configuration

Special alloys on request
- HC22
- SMO 254
- AL6XN.

One-piece mass-machined body
- Homogeneous surface finishing
- Removing roughness or defects, bound to outlets welding.

Flame sterilization, 1 outlet
- 1 outlet body configuration

6 types of sealing suitable to many applications
- PFA/EPDM or PFA/FKM plug
- EPDM, FKM, anti-acid FKM, VMQ diaphragm.

Ergonomic handle with opening and closing stops
- White plastic
- Stainless steel
- Red version or other color on request.

Benefits

- Hygienic design
- Numerous connections
- Optimum cleaning
- Tailor-made solution
- Good performance
- Compact and modular

CAR

The Definox CAR non-return valve allows the fluid to pass in only one direction and prevents any backflow. It uses a guided plug with spring return. Robust and hygienic in design, the CAR is perfectly cleanable and allows quick maintenance. It is available with welding ends or clamps, with different types of sealing to meet the constraints of your processes

Product advantages

2 types of sealing
- Elastomer (EPDM or FKM)
- PFA, 3A certified.

Metal metal variant
- Adapted to abrasive products or fluids with particles.

From DN1/2'' to DN125
- SMS, DIN or US sizes.

3 end connections
- Butt weld
- Clamp / clamp
- Between flanges.

PFA PTFE variant
- Adapted to CIP circuits and aggressive products.

Benefits

- **Easy maintenance**
- **Opening pressure**
- **Minimum Druck drop**
- **Hygienic design**

CAR Between Flange

The Definox CAR EBC flanged non-return valve allows the fluid to pass in only one direction and prevents any backflow. It uses a guided plug with spring return. Robust and hygienic in design, the CAR EBC is perfectly cleanable, it allows quick dismantling and maintenance thanks to its between-flange design. It is available with different types of sealing to meet the constraints of your processes

Product advantages

2 types of sealing
- Elastomer (EPDM or FKM)
- PFA, 3A certified.

From DN1/2'' to DN125
- SMS, DIN or US sizes.

PFA PTFE variant
- Adapted to CIP circuits and aggressive products.

Benefits

- Easy maintenance
- Opening pressure
- Minimum Druck drop
- Hygienic design

Vacuum pressure relief valve

The Definox PVV pressure/vacuum valve is a tank protection device during pressure and depression phases. Its robust and compact design allows quick and easy maintenance. The exhaust from these valves is not channeled.

Product advantages

Compact design, sizes 1½" to 4"
- 2" or 2,5" clamp connection.

Pressure range
- 0,2 to 3 bar, according to the spring.

4'' version
- Equipped with a manual forcing opening lever
- Clamp connection.

Benefits

- Easy maintenance
- Compact design
- Fixed calibration device

SORIO

The Definox SORIO control top allows the control and monitoring of Definox valves. The SORIO is available with 1, 2 or 3 solenoid valves, in digital, AS-i and IO-Link versions. Easy to use and implement, it allows fast commissioning. It provides innovative diagnostic and adjustment functions and allows permanent visualization of the valve status thanks to the 360° LED. Robust design, it is resistant to vibrations and projections (IP69K). Available with plastic or stainless steel cover.

Product advantages

360° visualization of the light
- Valve status visualization from all angles
- Remote valve status display
- Allowing to differenciate flows of different nature (IO-link version).

Hermetic and breathable
- IP 69K
- Gore-Tex ventilation membrane
- Safety valve in case of overpressure.

Plastic or stainless steel cover

4 cards for all configurations
- 1, 2 or 3 SV (solenoid valve)
- Magnetic linear sensor, 0,1mm accuracy
- Adaptable to all types of valves
- Compatible with Starmotion pigging systems.

Predictive maintenance, permanent and self-diagnosis
- Control and monitoring of valves (closing and opening phases)
- Available in Digital version with 1 to 3 solenoid valve(s)
- Equipped without or with 1 or 2 external sensor(s)
- Visualization of LEDs in transparency.

"

1 control top, 3 versions
- Digital
- AS-i
- IO-Link.

Benefits

- Smart and simple
- Teaching
- Locking function
- Predictive maintenance
- Downtimes reduction
- Low consumption

SORIO AIR ADD

The Definox SORIO additional air control top allows the control and monitoring of Definox valves. It is available in digital, AS-i and IO-Link versions. Design based on the Sorio, it keeps its advantages and allows air to be added to the actuator to increase pressure resistance.

Product advantages

LED visualization from the outside
- The white transparent plastic housing enables the LED visualization

Hermetic and breathable
- IP 69K
- Gore-Tex ventilation membrane
- Safety valve in case of overpressure.

4 cards for all configurations
- 1, 2 or 3 SV (solenoid valve)
- Magnetic linear sensor, 0,1mm accuracy
- Adaptable to all types of valves
- Compatible with Starmotion pigging systems.

1 control top, 3 versions
- Digital
- AS-i
- IO-Link.

Benefits

- Smart and simple
- Teaching
- Locking function
- Downtimes reduction
- Low consumption

SORIO BASIC

The Definox Sorio basic control top allows the control and monitoring of Definox valves during the closing and opening phases via two magnetic sensors. Available in 24V digital, the Sorio Basic is equipped with a terminal block that can receive 1 to 3 solenoid valves and can be supplied with 1, 2 or without proximity switches. The transparent white cover allows the LEDs to be viewed.

Product advantages

Digital version available

Waterproof (IP69k)
- IP69K

Terminal block
- Control top with a terminal block
- Fitted for 1 to 3 solenoïd valve(s)

LED visualization from the outside
- The white transparent plastic housing enables the LED visualization

Proximity switch
The control top can be supplied without or with 1 or 2 proximity switches.

Status indication
- Control top equipped with 2 magnetic sensors

Benefits

Low energy consumption

Cost effective

Easy and quick installation on the valves

SORIO DOUBLE ACTING

The Definox SORIO double acting control top allows the control and monitoring of Definox valves. The SORIO double acting is available with 1, 2 or 3 solenoid valves, in digital, AS-i and IO-Link versions. Easy to use and implement, it allows fast commissioning. It provides innovative diagnostic and adjustment functions and allows permanent visualization of the valve status thanks to the 360° LED. Robust design, it is resistant to vibrations and projections (IP69K). Available with plastic or stainless steel cover.

Product advantages

360° visualization of the light
- Valve status visualization from all angles
- Remote valve status display
- Allowing to differenciate flows of different nature (IO-link version).

Hermetic and breathable
- IP 69K
- Gore-Tex ventilation membrane
- Safety valve in case of overpressure.

Plastic or stainless steel cover

4 cards for all configurations
- 1, 2 or 3 SV (solenoid valve)
- Magnetic linear sensor, 0,1mm accuracy
- Adaptable to all types of valves
- Compatible with Starmotion pigging systems.

Predictive maintenance, permanent and self-diagnosis
- Control and monitoring of valves (closing and opening phases)
- Available in Digital version with 1 to 3 solenoid valve(s)
- Equipped without or with 1 or 2 external sensor(s)
- Visualization of LEDs in transparency.

MECA DPX

Handles are available for individual purchase to enable modular component stocking and quick replacement during maintenance operations, without requiring full valve replacement.The stainless steel trigger handle, lockable and multi-position, is designed for DEFINOX DPX and DPX EBC manual butterfly valves. Its multi-position system (5 intermediate positions + open / closed) ensures precise flow adjustment, while the padlock locking function secures the valve position during maintenance operations.The modular design ensures full interchangeability and allows quick handle replacement without removing the valve. The sleeve, available in several colors, facilitates process line identification.The handle can also be configured with position detection solutions: 0, 1 or 2 cylindrical M12 sensors for on/off detection or MVQ IO-Link rotary linear sensor enabling continuous valve position monitoring

A second handle version, called the micrometric handle, is also available. It provides an alternative enabling even finer operation and precise, repeatable valve position adjustment, particularly suited for applications requiring accurate flow control.

MECA DBAX

Actuators are available for individual purchase to enable modular component stocking or quick replacement during maintenance operations, without requiring full valve replacement.Repairable pneumatic actuator designed for DEFINOX DBAX series ball valves. The actuator is supplied with an integrated detection cam and a drive shaft enabling direct mounting onto the valve drive square.Depending on the selected configuration, the actuator can be delivered pre-equipped with a SORIO Basic wired control unit or SORIO control tops in wired, AS-i or IO-Link versions for valve position monitoring and control.

5-year manufacturer warranty, in accordance with the terms defined in the warranty document.

Product advantages

Serviceable actuator

- Easily transformable: Normally Open NO, Normally Closed NC or Double Acting DA.
- Can be equipped with Sorio control top.

Control Top and Signalling

- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

MECA DCX3

Actuators are available for individual purchase to enable modular component stocking or quick replacement during maintenance operations, without requiring full valve replacement.Repairable pneumatic actuator designed for DEFINOX DCX3, DCX4 and NEOS valves. The actuator is supplied without the valve disc and clamp, but with the seal carrier plate, common to all variants to ensure interchangeability.Available in single-acting (normally closed or normally open), double-acting, and long-stroke versions depending on valve configurations.

5-year manufacturer warranty, in accordance with the terms defined in the warranty document.

Product advantages

Serviceable actuator
- Easily transformable Normally Open NO, Normally Closed NC or Double Acting DA.

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

MECA DCX4

Actuators are available for individual purchase to enable modular component stocking or quick replacement during maintenance operations, without requiring full valve replacement.Repairable pneumatic actuator designed for DEFINOX DCX3, DCX4 and NEOS valves. The actuator is supplied without the valve disc and clamp, but with the seal carrier plate, common to all variants to ensure interchangeability.Available in single-acting (normally closed or normally open), double-acting, and long-stroke versions depending on valve configurations.

5-year manufacturer warranty, in accordance with the terms defined in the warranty document.

Product advantages

Serviceable actuator
- Easily transformable Normally Open NO, Normally Closed NC or Double Acting DA.

Control Top and Signalling
- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

MECA DPAX

Actuators are available for individual purchase to enable modular component stocking or quick replacement during maintenance operations, without requiring full valve replacement.Repairable pneumatic actuator designed for DEFINOX DPAX butterfly valves. The actuator is supplied with an integrated detection cam and welded mounting brackets enabling direct installation onto the valve drive square, with mounting identical to previous generations to ensure interchangeability.Depending on the selected configuration, the actuator can be delivered pre-equipped with a SORIO Basic wired control unit or SORIO control tops in wired, AS-i or IO-Link versions for valve position monitoring and control.Available in single-acting (normally closed or normally open depending on the drive square orientation) or double-acting versions. Actuators are available in GEN2 for sizes from ¾" to DN100 (DN104 included) and in GEN1 for DN125 and DN150.

5-year manufacturer warranty, in accordance with the terms defined in the warranty document.

Product advantages

Serviceable actuator

- Easily transformable into Normally Open NO, Normally Closed NC or Double Acting DA.
- Switch from NO to NC: quarter-turn the disc in open position before replacing the actuator.

Control Top and Signalling

- From the SORIO 1EV control unit, available in digital, AS-i or IO-Link versions.
- Compatible with SORIO Basic 1EV digital or secure M12 bracket sensor

MECA NEOS

Actuators are available for individual purchase to enable modular component stocking or quick replacement during maintenance operations, without requiring full valve replacement.Repairable pneumatic actuator designed for DEFINOX DCX3, DCX4 and NEOS valves. The actuator is supplied without the valve disc and clamp, but with the seal carrier plate, common to all variants to ensure interchangeability.Available in single-acting (normally closed or normally open), double-acting, and long-stroke versions depending on valve configurations.

5-year manufacturer warranty, in accordance with the terms defined in the warranty document.

Product advantages

Serviceable actuator
- Easily transformable Normally Open NO, Normally Closed NC or Double Acting DA.

Feedback and control
- With Sorio control top, available in Digital, AS-i and IO-Link versions
- 2 SV (solenoïd valves) for 1 microvalve
- 3 SV (solenoïd valves) for 2 microvalves.

Variants

MECA VEOX

Actuators are available for individual purchase to enable modular component stocking or quick replacement during maintenance operations, without requiring full valve replacement.Repairable pneumatic actuator designed for DEFINOX VEOX mixproof valves (VEOX, VEOX PMO, VEOX 3-body and VEOX tank bottom versions). The actuator is supplied with the lift-off actuator integrated, without the valve disc and clamp, but with the seal carrier plate, common to all variants to ensure interchangeability.Available only in single-acting normally closed version. Depending on the selected configuration, the actuator can be delivered pre-equipped with a SORIO Basic wired control unit or SORIO control tops in wired, AS-i or IO-Link versions for valve position monitoring and control.

5-year manufacturer warranty, in accordance with the terms defined in the warranty document.

Product advantages

Compact serviceable actuators
- Main actuator Normally Closed NC
- 2 breakaway actuators allowing the movement of the plugs independently.

Control Top and Signalling
- From the SORIO 1EV, 2EV or 3EV control unit (optional), available in digital, AS-i or IO-Link versions
- Compatible with SORIO Basic 1EV, 2EV or 3EV (optional) or with secure M12 bracket detection

Adjustable relief valve

The Definox PRV relief valve is a protection device. It is made up of three main parts, an L-shaped body, a plug and an adjustable device using different types of springs covering a range from 0 to 13 bars. The adjustment device consists of a removable stainless steel handle fixed at the top of the valve. It can be replaced by a cover which ensures protection of the pre-established setting.

Product advantages

L-body, sizes 1½" to 2"

Pressure range
- 0,2 to 3 bar, according to the spring.

Benefits

Easy maintenance

Compact design

Fixed calibration device

In Line Cleaning Station

At the end of a transfer cycle, production lines may retain a significant quantity of residual product. DEFINOX pigging systems enable efficient recovery of this material by pushing the remaining product through the pipelines. With STARMOTION® solutions, a pig is propelled through the line by a fluid, pushing the product toward the end of the pipeline. Once pigged and cleaned, the line is immediately ready for a new production cycle.The STARMOTION® in-line cleaning station is designed to ensure complete pig cleaning without dismantling or prolonged production downtime. Integrated directly into the pipeline, it automates pig insertion, transfer, cleaning, and return to the station, ensuring optimal line availability while maintaining a high level of hygienic safety.The cage design, combined with a locking cylinder, ensures pig retention during the process phase and enables full-surface cleaning through the turbulence of the cleaning fluid, providing high cleaning efficiency during CIP operations. A safety bayonet locking system is included as standard: in the event of residual pressure in the line, it prevents accidental dismantling and ensures safe maintenance operations. The cleaning station can be installed either at the launch or receiving end of the line, offering high installation flexibility according to process constraints and production sequences.Manufactured from hygienic 316L stainless steel and CIP-compatible, the station features an internal surface finish Ra ⩽ 0.8 µm (180 grit), ensuring excellent cleanability. Solid-machined bodies guarantee the absence of retention areas and provide high resistance to mechanical and thermal stresses.

Available with four types of welded or aseptic connections and two seal materials (EPDM or FKM), the station integrates easily into existing or new installations and can be used in combination with a receiving station to configure a pigging solution tailored to each process requirement.

Product advantages

Serviceable actuator
- Easily transformable Normally Open NO, Normally Closed NC or Double Acting DA.

From DN 25 to DN 150
- SMS, DIN or US sizes
- DN 150, on request

Serviceable actuator
- Easily transformable Normally Open NO, Normally Closed NC, Double Acting DA.

Control Top and Signalling
- From the SORIO 1EV, 2EV or 3EV control unit (optional), available in digital, AS-i or IO-Link versions
- Compatible with SORIO Basic 1EV, 2EV or 3EV (optional) or with secure M12 bracket detection

Numerous sealing solutions
- EPDM or FKM
- Adapted to fluids with particles or abrasive fluids.

Benefits

- Optimum cleanability
- No retention zone
- Costs under control
- Availability of the lines
- Hygienic and secured

Stop Station

At the end of a transfer cycle, production lines may retain a significant quantity of residual product. DEFINOX pigging systems enable efficient recovery of this material by pushing the remaining product through the pipelines. With STARMOTION® solutions, a pig is propelled through the line by a fluid, pushing the product toward the end of the pipeline. Once the pipeline has been pigged and cleaned, it is immediately ready for a new production cycle.The STARMOTION® receiving station is designed to ensure reliable pig reception at the end of the pipeline and secure retention during production, cleaning, or maintenance phases.Integrated directly into the pipeline and equipped as standard with a lip-reversing system that reduces pig wear, it ensures hydraulic continuity while protecting both the pig and process equipment. A safety bayonet locking system is included as standard: in the event of residual pressure in the line, it prevents accidental dismantling and ensures safe maintenance operations.Its hygienic 316L stainless steel design, CIP-compatible construction, spring-free design, and internal surface finish Ra ⩽ 0.8 µm (180 grit) ensure excellent cleanability and eliminate retention areas. Solid-machined bodies provide high resistance to mechanical and thermal stresses.

Available with multiple welded or aseptic connection types and seal materials (EPDM or FKM), the receiving station integrates easily into new or existing installations and represents a key component of a safe and efficient pigging system.

Product advantages

From DN25 to DN150
- SMS, DIN or US versions
- Variant up to DN 250.

Numerous sealing solutions
- EPDM or FKM
- Adapted to fluids with particles or abrasive fluids.

Benefits

- Optimum cleanability
- No retention zone
- Costs under control
- Availability of the lines
- Hygienic and secured

Dismantable PIG

At the end of a transfer cycle, production lines may retain a significant quantity of residual product. STARMOTION® pigging solutions enable efficient recovery of this product by propelling a pig through the pipeline using a fluid, ensuring maximum product recovery and rapid preparation of the line for a new production cycle.The STARMOTION® disassemblable pig is designed to provide high flexibility across a wide range of process fluids, including viscous, sensitive, or evolving products. Its modular design allows quick replacement of sealing lips according to wear or material compatibility requirements, reducing operating costs and maintenance downtime.

Manufactured from materials compatible with demanding hygienic environments, the pig ensures low friction, high scraping efficiency, and long service life. Available for multiple pipe diameters and lip materials, it provides a reliable and adaptable solution to optimize industrial pigging system performance. It is mainly used in cosmetic, non-aseptic food, and industrial processes requiring optimal product recovery and flexible maintenance.

Product advantages

From DN25 to DN104
- SMS, DIN or US versions

Use with various pushing fluids
- Use with numerous pushing medias: air, water, CO2, Nitrogen, process fluid, CIP fluid

Various grades of lip seals for use in numerous applications
- VMQ or reinforced VMQ
- FKM FFKM or anti-acid FFKM on request

Benefits

- **Flexible**
- **Longer use life**
- **Advantageous operating costs**
